

FACULTAD DE INGENIERÍA Y CIENCIAS APLICADAS

The image displays the Wazuh Open Source Security Platform interface and its installation process. The top section shows the Wazuh login page with a blue background and the Wazuh logo. Below the login form, the dashboard is visible, showing an overview of the system's status and security alerts.

The dashboard includes the following sections:

- AGENTS SUMMARY:** This instance has no agents registered. Please deploy agents to begin monitoring your endpoints. A button labeled "Deploy now agent" is present.
- LAST 24 HOURS ALERTS:** A summary of alerts categorized by severity: Critical severity (0), High severity (0), Medium severity (58), and Low severity (46).
- ENDPOINT SECURITY:** Includes Configuration Assessment, Malware Detection, and File Integrity Monitoring.
- THREAT INTELLIGENCE:** Includes Threat Hunting, Vulnerability Detection, and MITRE ATT&CK.
- SECURITY OPERATIONS:** Includes PCI DSS and GDPR.
- CLOUD SECURITY:** Includes Docker and Amazon Web Services.

The bottom section shows the Wazuh installation process on a Linux system. The terminal output displays the installation steps, including the creation of the Wazuh user and the installation of the Wazuh daemon and web interface.

```
wazuh-server#wazuh-server:~$ tar -xvzf /root/wazuh-install-files.tar wazuh-install-files/wazuh-passwords.txt

FACULTAD DE INGENIERÍA Y CIENCIAS APLICADAS

Configuración del agente

FACULTAD DE INGENIERÍA Y CIENCIAS APLICADAS

The image displays a Kali Linux terminal window and a Wazuh dashboard. The terminal shows the installation of the Wazuh agent on a Kali Linux system. The user runs the command `wget https://packages.wazuh.com/4.x/apt/pool/main/w/wazuh-agent/wazuh-agent_4.12.0-1_amd64.deb` to download the agent package. The package is then installed using `dpkg -i ./wazuh-agent_4.12.0-1_amd64.deb`. The user also runs `sudo systemctl daemon-reload` and `sudo systemctl enable wazuh-agent` to enable the service. The Wazuh dashboard shows the status of the agents, with one active agent (001) named 'Ubuntu-Prueba' with IP address 192.168.159.129. The dashboard also shows the top 5 OSes and top 5 groups.

Terminal Output:

```
ariel@kali:~$ wget https://packages.wazuh.com/4.x/apt/pool/main/w/wazuh-agent/wazuh-agent_4.12.0-1_amd64.deb
--2020-06-08 21:42:14-- https://packages.wazuh.com/4.x/apt/pool/main/w/wazuh-agent/wazuh-agent_4.12.0-1_amd64.deb
